LOCAL NOTES.

The Randolph mill, will be ready for

Our Charleston subscribers will receive their papers direct through the postoffice hereafter, instead of through a news agent,

Any well regulated Granger presenting himself at the office of the EPITAPH and proving that he is such, to the satisfaction of the agricultural editor, will be presented with an envelope of turnip seed, fresh from the department of agriculture. The seeds are branded "Red top strap leaf."

One of Tombstone's old residents, Mr-E. Swift, has invented an article that from present appearances promises to have a wide sphere of usefulness at no distant day. He has called it "Swift's Water Reducer," and its object is to confine water flowing through a faucet into a smaller As is well known, when there is a heavy force of water it will scatter in every direction when the faucet is turned on, and Mr. Swift proposes that his invention will cause the water to flow in a concentrated stream and also filter it as it issues from the pipe. He has applied for a patent, and when issued, it is expected the new idea will come into general use

BEAMS FROM BISBEE.

How the Fourth Was Celebrated-A Shorting Scrape-Accidents, Etc. Correspondence of the Epitaph.

BISBEE, July 12, 1882. Your society quill has evidently been "off his base," so to speak, since the memorable and much celebrated Fourth. We certainly expected to see ere this an account of our doings in Bisbee on that occasion, but as we have been so sadly neglected I hasten, even at this late day, and at the risk, too, of being a little subsequent, as it were, to assure you that we of Bisbee duly celebrated the national holiday with enthusiasm and propriety. We didn't have a man for break fast either; nevertheless there was a slaughter of the innocents. Yes, there was havon ong the chickens, and chickens are chickens in Bisbee, too; or to be more accurate it might be said they are the equivalent of coin. Well, as 11 fortunately fell out, Bob Henderson had the chickens. Bob, by the way, is our only colored cittzen-an enterprising and useful one he is, too-keeps a milk and chicken ranch about a mile below town, supplies the town with milk, down on Chinamen, and, inter nos (I wouldn't like to have it go any further, you know) he looks like a man who would vote the Democratic ticket. I discover an unfootunate tendency on the part of your correspondent to digress, but his offense may be palliated somewhat when it is remembered how easy the transition from the Fourth of July to the Democratic party. Indeed, are not the terms synonymous, and is not the term patriotism the synonyma?

But this is not describing the picnic. A picafe has been variously defined. A sententious friend says it is merely a cold lunch al fresco. A married friend says it is a d—d infernal nuisance. It is unnecessary to say that it was a he friend that so relieved himself. A young lady friend says: "It's just lovely!" A lady friend whose age is one of the Eleusinian mysteries. teries, says a picnic is a place where you sit down on the damp grass and perspire and eat ice cream and catch cold, while creeping things of hideous shape explore the person and take up lodging in the back hair. One old miner says if it means cold "grub" under a tree, he has been picnicing for the last twenty-five years. He cannot, therefore be expected to be an en-

thusiastic picnicer But this is not describing the picnic. Up to Saturday night preceding Tuesday, the Fourth, there was not the slightest indication of any public observance of the day. But on Saturday night three of our day. But on Saturday hight three of our ladies happened to meet, and in the course of their chat one proposed a picnic on the Fourth. It met with unanimous approval. With them to say was to do. The three ladies, Mrs. Bridge, Mrs. Wills and Mrs. Krigbaum, constituted themselves a committee of arrangements. The next day they had collected about a hundred dollars and had nearly everybody else in town pressed into service as cooks. Notwith-standing the very brief time in which to prepare, the picnic was a complete success. The place selected was about a quarter of a mile up the canyon, where there was plenty of good water and abundant shade. After the dinner, which was elegant and bountiful, various amusements were in-dulged in, swinging, foot-racing, sackracing, singing, etc., to the great interest and enthusiasm of participants and spectators. All were there and all seemed determined to enjoy themselves at the first picnic in Bisbee. Much credit is due to the ladies who had charge of the affair, and also all the ladies in the town, for they spared no pains or exertion to make it what it was-a complete success. In the evening a ball was improvised in the Bisbee House, which was well attended and enjoyed by all.

A few days ago a row occurred in the Mexican part of town and a Mexican called Chino shot Leonardo Alveres five times. Four of the bullets penetrated the body, but miraculously missed any vital point, although it was first thought that the wounded man could not live more then a few hours. He is now doing so well that the chances are in favor of his across the line before he could be appre-

Thomas Burch, a highly respected citizen, accidentally shot himself through the left toot to night. The bullet severed the main artery of the foot, and the wound bled profusely. Dr. Fenner was called, and with some difficulty, owing to the laceration of the artery, succeed in taking it up and tying it. The pistol was of the bull-dog pattern and Mr. Burch was exbuil-dog pattern and Mr. Burch was ex-amining it and revolving it to see if it would work, when it exploded and inflicted

Things are running along as usual at this mine, without any visible change.

the wound. Ben Williams leaves for the Denver Exposition on the 18th. It is predicted that Bisbee will make as handsome, if not

WEEKLY MINING REVIEW.

much work and considerable encouragement, in local mining matters. A gentleman who has been in the district from the beginning, gave it as his opinion that there was more actual work being done now than at any period in the history of the Tombstone district. The wonderful richness of the Randolph has given an impefus to prospecting on an extensive scale in the southwestern portion of the district. Scarcely a day but new developments of astonishing richness are made in the Ranwith a will to discover if the Randolph bonanzas extend to its neighbors. A strike of considerable magnitude has also been made in the Goodenough that promises, when opened up, to reveal an extensive body of ore. The other mines throughout the district are holding their own in good shape, and everything looks encouraging. richest ore ever taken from a Tombstone mine, and the supply seems inexhaustible The following are the latest facts connected with our great industry:

EAGLE Good progress has been made during the past week and the shaft is now down nearly sixty feet. A nice vein of ore was cut a few days ago, that from present appearances will concentrate with the main body in a short time. The mine is looking well and everything is

running along smoothly. BLUE MONDAY. Two drifts are being run, north and south, from the first level and the indicacations of a large ore body are very good. Work is progressing rapidly.

LONGFELLOW. This promising claim is located near the Stonewall, and was started up with a full force of men a few days ago. An air compressor is being fixed at the shaft, and as soon as completed, two drifts will be started from the 75 foot level. The mine is in excellent condition and showing up

STONEWALL.

The winze on the 160 foot level, 100 feet west of the shaft is now down 125 feet and looks very good. Connection was made between the 100 and 160 levels a few days ago, and stoping has now com-menced. A cross cut has been started north from the 160 level and is now in several feet. About twenty-five tons of ore are hoisted daily, and shipped to the

A drift has been started at 105 feet from the surface, and a large body of ore dis-covered. The ore is of the same quality as the Stonewall, and promises big things for the near future. RANDOLPH.

The Randolph still continues to gladden the hearts of its owners, and scarce a day passes but developments of an extraordinary character are reported. The mine eems to be a mountain of mineral with a few ribs of country rock running through it. All the drifts, cross-cuts, and winzes are in good ore and the more development progresses, the higher the grade of the ore mineral. Will commence shipping cre to the mill in a few days.

FAIR VILLA. Have not made much progress in sinking since last report in consequence of finding it advisable to timber the shaft from the bottom up, in places where the rock was most insecure and loose. Have put in four sets of timber, 4x6, with 2 put in four sets of timber, 4x6, with 2 inch cribbing. Ventilation is shaft now very good; at bottom of shaft a change fer the better took place, showing material of a very encouraging nature. Now down

eighty-three feet. INGERSOLL. he 80 level is making good progress. It is being driven in lime with very promising indications. A nice body of discovered in the south crosscut from the west drift. The stopes look about as usual. A rich ledge of mineral was struck in the west drift from the 120 level yesterday. The usual amount of ore is hoisted daily. and the mine looks in excellent condition.

This promising claim, located near the Ingersoll, was started up a few days ago. The shaft is now down sixty feet, and a contract has been let to sink sixty feet further. No pay matter has been struck as yet, but the indications are very good.

heretofore reported. Second class ore from the dump of the old works is being shipped to the Girard mill. A new ore bin has been placed in position to facilitate loading. Explorations on a large scale are being carried on in the mine and everything is looking well. The bullion product for last month was \$6,141.22. About 1300 tons

The drifts heretofore reported are going along about the same. The crosscuts in the 400 and 600 levels in the new works are making better progress in consequence of softer ground. The stopes all over the mine are looking about the same and yielding the usual amount of ore. There is about 2000 tons of ore at the mill, so that there may be no suspension during the rainy season.

HEAD CENTER. Stoping is continued above the first level, and thirty tons of ore shipped daily. The shaft between the first and second levels has been straightened, and water taken from the Husehuca main to the

Some very high grade ore carrying nathirty feet south of the whip shaft in the anything yet discovered.

foot levels are progressing rapidly. The south drift on the 400 level is yielding a small quantity of ore. A winze has been started from the 400 to 450 level. Stopplng is continued on the 400 and 450, and a nice quality of ore extracted. About 1000 tons of ore is now on the dump. A prospecting drift has been started east Tranquility new shaft. The mine is look-

TOMBSTONE M & M. CO. A fine body of ore was discovered, Tues-day, in No. 1 incline of the Goodenough. The West Side is looking better. The stopes throughout the mine are looking well and yielding five loads of ore, or about sixty-five tons daily. There is about one week's run of ore ahead at the mill.

OLD GUARD. ity and quantity, and the works heretofore reported are being continued.

WORK OF A POP.

Two Old Men Quarrel Over a Cock Fight, and One Gets Killed.

The devotees of the cock pit are willing

to swear that it is the most charming sport in the world, and that a chicken fight can produce more excitement and enthusiasm to the square inch than any other known amusement. As is generally known there is a cock pit on Allen street, in rear of saloon, and lovers of the sport are in the habit of assembling there in the The incline from the 80 level is still going up, and struck a good streak of right ore a few days ago. The west druft from old men, named Young and Bobier, who resided on a ranch about two miles and a ment of the United States. Dr. McSwegan half northeast of town. These gentlemen brought the original stock from Kentucky. and by careful propagation, were the owners of several game birds, which they sold, matched or rented, at the cock pit, as the necessities of the cese demanded. In addition to chicken culture, the old men burned lime, and raised some vegetables for the Tombstone market. A few days ago, they sold a game rooster to a gentleman of this city, and at the main, Sunday, this same bird, which they sold a few days previously, was matched against one of theirs. Albert Y. Young, one of the partners, was referee of the contest, while William Bobier, the other partner, by the description of the contest will be described by the second and the same before he could do so he was completely enveloped in the flames, and all avenues of escape, cut off. A friend of his who accompanied was referee of the contest, while cut off. A friend of his who accompanied him, deserted him in his peril, and the bird in the pit. It is generally conceded that the chicken out, and good progress made in the works owned jointly by the old men was beaten but a technicality, however, existed, and much chin music was wasted in an en-deavor to settle the dispute. Finally the matter was referred to Young as referee, and he declared it a draw, and all bets off. This angered Bobier more than a little, and he denounced the old man in unmeasured terms. He went so far, as was testiof ore is on the mill dump in anticipation of the rainy season.

GRAND CENTRAL.

fied at the inquest, as to threaten to kill old man Young, besides hurling at him all the vile names in the calendar of vituberation. Mr. Walsh, the proprietor of the s-loon, testified that Bobier said he did not fight cocks for his health, and that he did not like the idea of "outsiders" getting away with him. The old men started home together, Young having corn for the chickens, beef and other things in a sack which he carried on his shoulder.

According to Young's story as told to an
EPITAPH reporter early in the day, and testified to before the coroner's jury, as soon as they were out of town Bobier commenced to abuse him violently, threatened to kill him, and finally struck him a blow with his fist on the ear that knocked him Young says notwithstanding that. hoisting works. Steam noisting works will be erected in a few weeks.

he preserved his temper, and only temper hoisting works strated with his angry partner. Bobier's anger still continued to rise; he used foul names in reference to Young's mother which had the effect of angering the latter tive gold and green horn silver in large and he said his mother was as good as quantities is being taken out of the drift Bobier's; that she had been in her grave a thirty feet south of the whip shaft in the 80 foot level. The ore body seems to be extensive and richer in quality than anything yet discovered. mything yet discovered.

EMPIRE.

The north drifts from the 400 and 450 run, and some twenty feet ahead of Bobier. The latter followed him, and Young drew a toy pistol, carrying a 22-caibre ball and fired as he run, without taking aim, mere ly thrusting his hand backward and pul ling the trigger. The little bullet entered Bobier's heart; he run a few steps further, and fell forward dead. This occurred near prospecting drift has been started east the cabin occupied by Colonel Wiggans, of the old shaft and directly north of the quarreling, and came to the door in his night clothes to see what the difficulty was Just as he got to the door Bobier fell. Young approached him and asked him it he woul in't go and see if he was dead, saying that he would not have killed him the world. An examination showed life to be extinct, and the body was put in s passing wagon and brought to the undertakers. Young also came to town and surrendered himself. The deceased had the reputation of being a quarrelsome man and bard to get along with. He was more or

less under the influence of liquor at the

of the boy. The lad got the pistol some way, and was eternally practicing. He shot a dog a few days ago, and the old man fearing that he might do other mischief took the pop away from him and threw it into the sage brush. While walking around Saturday he came on the pistol and put it in his pocket, and there it remained until taken out on Sunday evening. The killing occurred about half-past seven. Coroner Matthews empanelled a jury yesterday and facts in substance as above, were elicited.

The tollowing verdict was rendered: Territory of Arizona, County of Cochise: We, the undersigned a jury empanelled by the Coroner of said county, to inquire whose the body submitted to our inspection, when, where and under what circum stances, he came to his death, after hearstances, he came to his death, after hearing such testimony as has been brought before us, and viewing the body, find that his name was William Bobier, age unknown, nativity unknown, and that he came to death in Tombstone, A. T., July 16th, 1882, from the effects of a pistol shot nflicted by Albert Y. Young, as the jury believe, in self-defense: and that the kill-ing was justifiable. Signed, E. M. Ritches, E. R. Rider, E. L. Bradshaw, B. R. Wii -ders, Joe Price, W. A. Falley, N. Alexan-

WEDNESDAY'S BLAZE.

Fierce Battle With the Flames -A Young Man Seriously Burned - Har-

rah for Huachuca Water. At ten minutes past eleven Wednesday night the whistle of the Vizina It now transpires that Mr. Grafton, St.

L. Abbot has not gone to Alaska as reported, but is instead taking a vacation at Wellsly Hills, Massachusetts, his father's scene of the conflagration on the cornhoisting works puffed forth the dire er of Fourth and Toughnut streets. Already the desolating flames were waving hither and thither engulphing everything that touched them in their fierce embrace. The fire started in a bedroom attached to the New Orleans restaurant, kept by Mrs. Jones. The building being constructed of light lumber, and parched with drought accepted the flames with the same readiness as loose cotton. The adjoining building, the truck house of the Rescue hook and ladder company was soon en-veloped by the desclating element, and for a while it seemed as if the dreadful scenes of destruction and ruin that were witnessed less than two months ago were about to be repeated. On Fourth street a scene of wild confusion prevailed. Women with bare feet and scanty clothing were darting from the burning building; excited men jostled each other hither and thither; pected back on the 25th.

Prof. John A. Church, superintendent of the T. M. & M. Co. arrived in town last night.

Active preparations are being made for the resumption of work at the Girard. In the resumption of work at the Girard. The headway made by the flames was an assurance that destruction must ensure of assurance that destruction must ensue. The fierce, proud, destructive monster of flame, under the impulse of a slight breeze, jumped fifty feet high, bending sideways in the descent and ashing the adjoin-ing buildings. Seven minutes after the first slarm of fire the Engine Most of the producing mines bave enough ore ahead at the mills, to provide against accident, or bad roads during the stream from the new water and the new w stream from the new water works. A glance taught them that the water was

boss, and a shout of joy and thanks and praise rent the air. The Eugine Company performed better service. With never performed better service. With good water power they showed what mettle they were made of. Two streams were turned on, one from Toughnut and the other from Fourth. A few dashes of water extinguished the lames, and heeding not the torturing smote, the gallant fire not the torturing smore, the gallant fire boys entered the building, extinguishing the flames as they went, until they reached the rear of the building, the point from which the flames were being fed. They were now in the centre of the partially demolished structures. 'A few gushes of the powerful water against the ceiling bored a hole through the roof, thus allowing the stream to use through and allowing the stream to pass through and fall in graceful ease on the igniting top of the building. Twenty minutes after the first alarm the fire was exinguished, and it was as well performed a piece of work as could be done by the crack fire departwas the first to give the narm, and he is

is unknown, but is supposed to be either accident or carelessness The most serious matter connected with it is the serious, perhaps atal burning of Billy Fee. This well known young man had his trunk and clothes in a room in the burning building, and recl: lessly rushed in to try and save his property. Before he could do so he was completely enveloped highly commended, struggled and fought and pushed and climbed, surrounded by the burning flames that were eating into his flesh, and the sufficating smoke scarc-ly worse, until he regained the highway. He was borne to the Surnyside lodging house and Dr. Blackwood summoned to render medical assistance. He was fear-fully burned, the flesh being blistered and the skin torn off almost completely from his body. His hair was almost burned off and his face scorched horribly. The doctor attended to his wants as

loud in praise of the engineer of the Vizina

on account of his promptness in sounding the general alarm. The origin of the fire

well as possible, but at midnight could not say whether the patient could re-The principal losers are Mrs. Jones the restaurant keeper, who was not insured, and Webster Street, the well known lawyer, whose furniture and library were much damaged by the hasty removal. The building is owned by Jordan Peters, who was fully insured. The loss at this time it is almost impossible to determine, but it will certainly be not less than \$5,000. The truck bouse of the Hook and Ladder Company was also demolished, and clothes and other articles belonging to some of the members destroyed. There are also a number of individual losses of clothing and valuables, almost impossible to compute at the present time.

Bob McDonald, of Bisbee, challenges Prof. Costello to a fistic encounter, as fol-lows: Costello is a middle weight champion; I am a light weight. DEATH OF JOHN RINGO. His Body Found in Morse's Canyon.-Probable Suicice.

Sunday evening intelligence reached

this city of the finding of the dead body of

canvon in the Chiricahua mountains on Friday afternoon. There was few men in Cochise county, or Southeastern Arizona better known. He was recognized by friends and foes, as a recklessly brave man, who would go any distance, or undergo any hardship to serve a friend or punish an enemy. While undoubtedly reckless, he was for from being a desperado, and we know of no murder being laid to his charge. Friends and foes are unanimous in the opinion that he was a strictly honorable man in all his dealings, and that his word was as good as his bond. Many people who were intimately acquainted with him in life, have serious doubts that he took his own life, while an equally large number say that he frequently threat-ened to commit suicide, and that event was expected at any time. The circumstance of the case hardly leave any room for doubt as to his self destruction. He was about 200 feet from water, and was acquainted with every inch of the country, so that it was almost impossible for him to lose himself. He was found in the midst of a clump of oaks, springing from the same stem, but diverging outward so as to leave an open space in the centre. On top of the main stem and between the spreading boughs, was a large stone, and on this pedestal be was found sitting, with his body leaning backward and resting against a tree. He was found by a man named John Yost, who was acquainted with him for years, both in this Territory and Texas. Yost is working for Sorgum Smith, and was employed hauling wood. He was driving a team along the road, and noticed a man in the midst of the clumb of trees, apparently asleep. He passed on without further investigation, but on looking back, saw his dog smelling of the man's face and snorting. This excited curiosity, and he stopped the team, alighted, and proceeded to investigate. He found the lifeless body of John Ringo with a hole large enough to admit two fingers about half way between the right eye and ear, and a hole correspondingly large on top of his head, doubtless the ou the fatal bullet. The revolver was firmly clenched in his hand, which is almost conclusive evidence that death was instan-His rifle rested against a tree and one of his cartridge belts was turned upside down. Yost immediately gave the alarm, and in about fifteen minutes eleven men were on the spot. The subjoined statement was made by the eye witnesses

to Coroner Matthews: TURKEY OR MORSE'S MILL CREEK. Statement for the information of the Coroner and Sheriff of Cochise county, Arizona: There was found by the undersigned, John Yoast, the body of a man in a clump of oak trees, about twenty yards north from the road leading to Morse's mill, and about a quarter of a mile west of the house of B. F. Smith. The undersigned viewed the body and found it in a sitting posture, facing west, the head inclined to the right. There was a bullet hole on the top of the head on the left side. There is, apparently, a part of the scalp gone, including a small portion of the forehead and part of the hair. This looks as if cut out by a knife. These are the only marks of violence visible on the body. Several of the undersigned identify the body as that of John Ringo, well known in Tomb-stone. He was dressed in light hat, blue shirt, vest, pants and drawers. feet were a pair of hese and an undershirt torn up so as to protect his feet. He had evidently traveled but a short distance in this foot gear. His revolver he grasped in his right hand, his rifle resting against the tree close to him. He had on two carr-ridge belts, the belt for revolver cartridges being buckled on unside down. The undernoted property was found with him and on his person; 1 Colt's revolver, calibre 45 No. 222, containing five cartridges; 1 Winchester rifle octagon barrel, calibre 45, model 1876, No. 21,896, containing a cartridge in the breech and ten in the magazine; 1 cartridge belt, containing 9 rifle cartridges; 1 cartridge belt, containing 2 revolver cartridges; 1 silver watch of American Watch company, No. 9339, with silver chain attached; two dollars and sixy cents (\$2 60) in money; 6 pistol cartridges in pocket; 5 shirt studs: 1 small pocket knife; 1 tobacco pipe; 1 comb; 1 block matches; 1 small piece tobacco. There is also a portion of a letter from Messrs. Hereford & Zabriskie, attorneysat law, Tucson, to the deceased, John Ringo. The above property is left in the possession of Frederick Ward, teamster between Morse's mill and Tombstone.

The body of deceased was buried close where it was found. When found deceased and been dead about twenty-four hours Thomas White, John Blake, John W. Bradfield, B. F. Smith, A. E. Lewis, A. S. Neighbors, James Morgan, Robert Bolter, Frank McKenney, W. J. Dowell, J. C. McGray, John Yoast, Fred Ward.

From Fred Ward, who arrived in the city on Sunday evening, an EPITAPH reporter learned that the general impression prevailing among people in the Chirica-huas is that his horse wandered off somewhere, and he started off on foot to search for him; that his boots began to hurt him, and he pulled them off and made mocca-sins of his undershirt. He could not have been suffering for water, as he was within 200 feet of it, and not more than 700 feet from Smith's house. Mrs. Morse and Mrs. Young passed by where he was lying Thursday afternoon, but supposed it was some man asleep, and took no further notice of him. The inmates of Smith's house heard a shot about three o'clock Thursday evening, and it is more than likely that that is the time the rash deed was done He was on an extended jamboree the last time he was in this city, and only left here ten days ago. He had dinner at Dial's in the South Pass of the Dragoons one week age last Sunday, and went from there to Galeyville, where he kept on drinking heavily. We have not heard of his whereabouts after leaving Galeyville, but it is more than likely that he went to Morse's canyon. He was subject to frequent fits of melancholy and had an abnormal fear of being killed. Two weeks ago last Sunday in conversing with the writer he said he was as certain of being silled, as he was of being living then. He said he might run along for a couple of years more, and may not last two days. He was born in Texas and is very respectably connected. He removed to San Jose, California, when about sixteen years old, and Col. Coleman Younger, one of the leading citizens of that town is his grandfather. Ringo was a second cousin to the famous Younger brothers now in the Minnesota peniten-tiary, for their partnership with the James boys. He has three sisters in San Jose, of whom he was passionately fond. He was about thirty-eight years old, though looking much younger, and was a fine specimen of physical manhood. Many triends death.

"Muldoon's Picnic" was not produced at the Bird Cage Wednesday evening in consequence of Harry Morton, who was to impersonate the immortal Muldoon, hav-ing taken a "cologne bath" while laboring to extinguish the fire. By proper scrub-bing and bleaching he made himself presentable last night, but the clothes he w on the occasion were consigned to a silent

VIGORIT POWDER!

JUDGE FIELD OF THE U. S. SUPREME COURT DECIDED, OCTOBER 12, 1880, THAT Vigorit Powder is no infringement of the Giant Powder patents, but on the contrary "in no respect within their contemplation." It is indicrous as well as libelous therefore to term the powder an adulteration of imitation of one scientifically inferior.

Experience and use have proved for the Vigorit Powder: ist—That it is a safer powder for transporting and handling than the other Nite-Glyceria
2d—That with an equal explosice power it is very free from hurtini fumes.
3d—That it is much less affecte by heat cold or moisture.
4th—That it can be tightly tamped without risk of explosion.

Risks of Accidents Will Be Very Greatly Lessened, If not allogother overcome, by a general use of this powder in the mines. "We have yet to hear of a single human being who has been injured by it."

The Vigorit Powder Company manufacture on the most scientific principles three grades of powder, known as Nos. 1, 2 and 3 respectively, designed for the different classes of blasting, and war ranted to be superior to any powder in use. The prices for Vigorit will be the same as are asked of the corresponding grades of Giant and Hercules.

137 Best quality of Fuse, and Single, Double and Triple Force Caps soid at lowest rates.

138 Send for pamphlet showing methods of testing the different qualities of all powders, their relative strength, safety, etc. No comparision based upon scientific inquiry or actual use is leared
